

Cost Savings Strategy COR Maintenance Audits

Did you know employers can save the cost of hiring a contract External Auditor for their maintenance audits? By sending an employee to Energy Safety Canada's Certified Health and Safety Auditor Program, that person can become the company's Internal Auditor.

Maintenance audits are required for two of the three-year COR cycle, and having an Energy Safety Canada Internal Auditor provides valuable cost savings for the employer in both maintenance years.

Here is where you can find more information:

- To learn about *Track 1: Internal (Maintenance) Auditor*, click [here](#)
- To review the courses required to become an Internal Auditor:
 - Safety Program Development, click [here](#)
 - Certified Health and Safety Auditor Program, click [here](#)
- To register, complete the Internal Auditor Application form [here](#)
